Logical Form of the Covid - Climate Crisis Argument

Let:

P = "Covid is a public health crisis"
Q = "Climate Crisis is a public health crisis"
R = "Governments respond quickly to a public health crisis"

The argument:

If "Covid is a public health crisis" then "Governments respond quickly to a public health crisis" (P -> Q)

if "Climate Crisis is a public health crisis" then "Governments respond quickly to a public health crisis" (Q -> R)

If "Covid is a public health crisis" then "Climate Crisis is a public health crisis" (P -> Q)

Therefore "Governments respond quickly to a public health crisis" (|= R)

The Truth Table for the argument:

	P	Q	R	P -> R	Q -> R	P -> Q	|= R
1	T	T	T	T	T	T	T
2	T	T	F	F	F	T	F
3	T	F	T	T	T	F	T
4	T	F	F	F	F	F	F
5	F	T	T	T	T	T	T
6	F	T	F	T	F	T	F
7	F	F	T	T	T	T	T
8	F	F	F	T	T	T	F

In line 8 there is a counterargument (premises are true but the conclusion is false) therefore it is a logically invalid argument. A counterexample could be in the case of war.
